MultiScreen App - Rubric

Concept	Limited / No Evidence (1)	Inconsistent Evidence (2)	Strong Evidence (3)	Score
Application Design and Screen Transition	The application fails to use enough screens and does not give the user sufficient options.	The application does not have 4 screens. Existing screens are not helpful and transitions do not work fully.	The application makes use of at least 4 screens. Each screen performs an important function and allows the user to start, re-start and end the application easily.	
User Interface and Experience	The user interface offers limited communication to the user.	The user interface could use more clarity. Objects need to be more visible and give more meaningful instructions.	The user interface is clear and easy to interact with. Objects are strategically located and give meaningful instructions to the user.	
Planning, Coding and Presentation	There is minimal use of planning. The application does not handle events appropriately.	The student has not made full use of the planning guide. The handling of events is inconsistent and the application lacks visual appeal.	The student has made effective use of the planning guide, and has used efficient coding to handle all events and present a visually appealing application.	
Peer Review	The peer review process was not used.	The student has not used the peer review process to help his/ her application or others.	The student has participated in the peer review process, giving good reviews and using feedback provided.
